## SECTOR SKILLS STRATEGY IN ADDITIVE MANUFACTURING

### What?

We aim to address the critical issue of workforce development for Additive Manufacturing (AM) by developing a shared skills vision and collaborative learning solutions for the sector at European level.

### How?

As a consortium of project partners from all over Europe, we are looking to develop a central system for the identification of the AM skills necessary to supply industry now and in the future.

### Why?

We are engaged in addressing current and future Industrial AM skills needs, through the creation of an AM Observatory and the implementation of a European AM Qualification System.

### Who?

Our project partners come from industry, associations, vocational training and academia to ensure we are best placed to understand the Additive Manufacturing (AM) landscape.
